◎ Profile

Senior software engineer specializing in Javascript and many of its popular frameworks, like React, Node, Express, React Native, etc.
I have several years' experience managing teams of engineers and delivering software products.

◆ Education

BS - Entrepreneurial Management   **Brigham Young University**

September 2016 - December 2019   Provo, UT

Repeated coursework in Information Systems, innovation, analysis, and management.

💼 Employment History

Senior Software Engineer at Suds Creative   Meridian, ID

September 2020 - Present

As the lead engineer on our product development team, I architect and build systems, review code, and serve as Scrum Master. In this position, I've mainly worked in Node.js, React.js, and SQL. I've also used vanilla Javascript and PHP in this role.

Technical Product Manager at Standard Behavior   Salt Lake City, UT

January 2020 - April 2020

Standard Behavior recently expanded into app development with the acquisition of App Raptors team members. In my role, I was in charge of sales, onboarding, and management for development projects.

President, Product Manager at The Daily Shifts   Salt Lake City, UT

January 2019 - February 2020

The Daily Shifts is a new SaaS company with the mission to help customers reach their highest selves, and released its core iOS application in 2019. In this role, I oversaw the quality assurance aspects of the application and supervised the development team.

Chief Executive Officer at App Raptors   Provo, UT

June 2018 - January 2020

App Raptors was a software design and development firm that built apps and websites for companies and new entrepreneurs. As CEO, I oversaw all customer-facing and internal/strategic operations of the company until merging with the Standard Behavior team.

Company Administrator at App Raptors   Provo, UT

March 2018 - June 2018

Took charge of administrative functions of the business, including accounting, invoicing, payroll, project documentation, and more. Worked directly with company executives to prepare reports, create proposals, and assist in the sales process.

Software Development Intern at Intel Corporation   Hillsboro, OR

September 2013 - July 2014

Provided QC in a team of software engineers tasked to build enterprise reimbursement software for companies like Apple, HP, and Samsung.
